magics that keep you alive. Whenever you are subject to such a spell, you take force damage equal to the spell's level or 10% of the creature generating the effect, whichever is less.

Midnight Apparitions. A dabbler takes 20 radiant damage when it starts its turn in sunlight. Your radiant vulnerability does not apply to this damage, though. While in sunlight, you have disadvantage on attack rolls and ability checks.

Superior Darkvision. Seeing the world through magical eye sockets, you have superior vision in dark and dim conditions. You can see in dim light within 120 ft. of you as if it were bright light, and in darkness as if it were dim light. You can't discern color in darkness, only shades of gray.

Undead Immunity. As an undead being, you lack the physiology to be affected by poison. You are immune to poison damage and the poisoned condition, unless the poison or effects explicitly state that they affect undead as well. Additionally, you have resistance to necrotic damage.

Undead Senses. As a skeleton, a dabbler doesn't require air, food, drink, or sleep.

Languages. You can speak, write and read Common, Halting and Undercommon.

THE MIRTHFUL MARIACHI

(HARD COLLECT)
 Bands of the mirthful mariachi "volajo" like art about never actually taught and comes naturally to most practitioners for the driving and vibrating rhythms of the underworld in the strings of their guitars. In love with both their ranged expertise, coming and the melodies they use to bring the tunes of their strange home to life, these bands are tinkers and tumbadors, blending their expertise with ranged weapons with a keen ear and a wide smile.

BONUS PROFICIENCIES
 When you join the mirthful mariachi at 3rd level, you gain proficiency with 1 skill of your choice as well as ranged weapons and musical weapons.

CROSSOVER OF DESTRUCTION
 Also at 3rd level, you learn to tinker with ranged weapons. You may, with a day's work, combine an instrument you are proficient with and a ranged weapon you are proficient with. You can make harp-axes, violin-saws, guitar-crossbows or any other combination you can think of. The combination retains the properties of the ranged weapon and is known as a crossover weapon. You are automatically proficient with the resulting crossover weapon, though all other creatures suffer disadvantage when trying to use your modified instrument. Additionally, when firing this weapon, you do not gain disadvantage for firing at long range and gain your Charisma modifier as a bonus to the attack roll to hit your targets.

FUNGLET

These are the children of the mushroom jungles of the Underworld. They are true children of nature, embracing the fungal forests they call home as though each individual capped stalk growing in the subterranean soil were a cousin or sibling. Philosophers have come to believe that they are the sentient expression of lush Underworld forests, literally made for and by the mushrooms themselves. While they are predominantly loners, a small society of funglets have gathered in Dregharka's Bayou, a fungal jungle bordering the Forever Deep.

HISTORY

The fall of the Dracoprime in the Great Schism presaged the arrival of the funglets in the mushroom jungles below Avenier, but their true origins are disputed both amongst themselves and Underworld scholars. They aren't a particularly private or xenophobic race, but their reverent worship of the subterranean groves that birthed them keep the funglets from traveling the breadth of the world, and most folk who even know of the fungal men make no distinction between their individual beliefs.

Fantafunglets have deduced that they are the natural evolution of mushroom life. Acting as the historians of their race, they place phenomenal value on reasoning and logical skills—all the pertinent information at their disposal ultimately concludes that while some catalyst may or may not have been present

at the time of their appearance after the Great Schism, they are undeniably birthed by a fungal forest.

Audirefunglets believe they are vestiges of the Dracoprime's life force, carried to the mushroom jungles by its blood. They refer to the massive draconic idol as the Natural Force (NG, minor deity) and refuse to recognize the claims made of its origin with the Progenitors and their slaves. Instead they personify it as a deity of their own image, a powerful force that persists through each of them.

Maculofunglets worship the oldest living thing on the planet, the Honningsop Mushroom, as their patron god and creator. According to their legends they were born within the enormous rhizomorphs of Avenier's eldest organism, carried across the Underworld to the many mushroom jungles that fill its endless caves. Any trace of the Honningsop is treated with even greater reverence by maculofunglets than their kin, but the Natural Force sees their faith as equally worthy devotion.

GITWERC

These kings of the Underworld live in the deepest, darkest caves far below the surface of Avenier. Surrounded by bat, hissing lara and sulfur vents, their rule over the depths of hell is unopposed. Little is known of these nec rulers, and those that dare travel to their lairs rarely return. Spoken of only in legend, the gitwerc are rumored to have dark dealings with devils, using souls as currency. Living so close to hell, they no had creatures ever and all turned fleshed by their infernal associations. They are both feared and hated by all of their Avenier kin, and many apprentices are quick to renounce their bloodline devils. They are voracious, voracious creatures and while nearly all of them are evil, it is well known that when they forge a pact they will uphold it although their are rarely with anyone other than dark and powerful beings.

HISTORY
 During the *Parting of the Deep*, the gitwerc abandoned the gods' meddling and tumbled down to the very core of the world of Avenier. Only devils lived in this hellish realm, powerful beings as old as time with no mortal intent. The ancient devils negotiated with the ancient gitwerc, arguing that playing their hand in the game with the gods would be a boon to both parties: the gitwerc would gain power and rule over the levels of the Underworld directly above hell with unchallenged authority derived by the infernal gifts exchanged in the compact, in return the gitwerc would siphon souls down to hell for the devils' enjoyment and consumption, until the end of time. Each of the abandoned devils signed their oaths with the red powers in blood, and all of their descendants are sworn to uphold the bargain or forfeit their own names in the chaotic, torrid infernal hellsides without recourse should they renege.

While they would never admit it freely, the gitwerc were actually greatly concerned with the Great Schism. They knew of the coming of the Dracoprime far before the Progenitors did—were it not for their efforts, the coming plans of the primal dragons would surely have been noticed long before they could come to fruition. Moreover, the Great Schism was something the gitwerc and madhouse gitwerc had been waiting for since they made their ill agreement with hell. The devils' desire to make a deal that would remove the devils that had feebly entered their infernal realm—had forever the calamitous event and traded the lordship ascent to and the diabolical compact. The spite-filled gitwerc saw the great opportunity presented by the overthrow of the three great draconic races, seeing hundreds for perhaps thousands—may be more souls in any that fell into the exact numbers of their kind throughout the societies of their kin.

These agents of hell make good on their devilish agreement, often acting as the purveyors of the settlements they've railroaded (stealing away the souls

HISTORY

During the *Forging of the Dawn*, the githwerc shunned the gods' meddling and traveled down to the very core of the world of Avernir. Only devils lived in this hellish realm, powerful beings as old as time with malevolent intent. The malicious dwarves negotiated with the ancient entities, arguing that playing their hand in this game with the gods would be a boon to both parties: the githwerc would gain power and rule over the levels of the Underworld directly above Hel with undisputed authority derived by the infernal gifts exchanged in the compact. In return the githwerc would siphon souls down to Hel for the devils' enjoyment and consumption, until the end of time. Each of the abandoned dwarves signed their oaths with the evil powers in blood, and all of their descendants are sworn to uphold the bargain or forfeit their own essence to the chthonic beings (often hunted down without remorse should they refrain).

While they would never admit it freely, the githwerc were actually greatly concerned with the *Grand Sculpting*. They knew of the coming of the Dracoprice far before the Progniters did—were it not for their efforts, the cunning plans of the primal dragons would surely have been noticed long before they could come to fruition. Moreover, the *Grand Sculpting*, was something the potent and insidious githwerc had been waiting for since they made their fell agreement with Hel. The devils—keen to strike a deal that would entice the dwarves that had foolishly entered their infernal realm—had foreseen the calamitous event and traded the foretelling secret to seal the diabolical compact. The spite-filled githwerc saw the great opportunity presented by the sundering of the three divine dwarven races, seeding hundreds (or perhaps thousands—may fortune smile on any that find out the exact number) of their kind throughout the societies of their kin.

These agents of Hel make good on their devilish agreement, often acting as the morticians of the settlements they've infiltrated (stealing away the souls

GITWERC

These kinds of the Underworld live in the deepest, darkest caves far below the surface of Avernir. Surrounded by hot, bubbling lava and sulfur vents, their rule near the depths of Hel is undisputed. Little to nothing is known of these rare dwarves, and those that dare travel to their lands rarely return. Spoken of only in legend, the githwerc are rumored to have dark dealings with devils, using souls as currency. Living so close to Hel, they are foul creatures one and all, turned fiendish by their infernal associations. They are both feared and hated by all of their dwarven kin, and many upperworlders are quick to immediately brand them devils. They are sneaking, scheming creatures and while nearly all of them are evil, it is well known that when they forge a pact they will uphold it (although these are rarely with anyone other than dark and powerful beings).

5E and GMS players get a completely redesigned version, from the redesigned version of this class, adapted to 5E power level, with two complex archetypes that dramatically change the gaming experience of these mutant nightmares. 24 pieces of new breed/class art added to the book (completely unlocked)!
À Hero Lab File (5E) à Hero Lab File (PF)
À Fantasy Grounds (5E)
